Hands off Gaza. Victory to the Intifada.

Saturday 3 January, 6.00 pm

Public Meeting (following the national demonstration in London)
Speakers and discussion

Meeting Room above Lucas Arms, 245a Gray's Inn Road, WC1X 8QY
(near Kings Cross)

Israel is trying to wipe out the Palestinian people. It claims to be acting in self-defence; it says it has a duty to defend its population from rocket attacks. Do you know how many people have died as a result of Qassam rocket attacks in the last seven years? 15! Meanwhile, hundreds of Gazans have been killed in the last few days alone.

Not happy with the democratic choice of the Palestinian people, Israel is seeking regime change in Gaza (having already effected regime change in the West Bank). Foreign Minister Livni has clearly stated that it is her "strategic objective to topple the Hamas regime in Gaza".

If Israel genuinely wanted to stop the Qassam rocket attacks, it could have done so very easily by complying with the terms of the ceasefire, under which it was supposed to lift the blockade against Gaza in order to end the humanitarian crisis there. It totally failed to respect those terms, and therefore should not be surprised that the ceasefire has collapsed.

The right to resist occupation is enshrined in international law, and the Palestinian military resistance to Israeli occupation is legitimate and laudable. We reiterate the call of Khaled Meshaal, leader of Hamas, for a renewed intifada against Israel. Only through the intensification of the Palestinian resistance will Israel be forced to recognise the right of the Palestinians to freedom from colonial occupation.

Come to this urgent meeting, including a speaker arrested at picket of Israeli Embassy, join the discussion and form part of a growing movement in the imperialist countries against imperialist aggression.
